

GSU work experience with ARAMFO Educational Foundation

Our collaboration with ARAMFO Foundation for Multicultural Understanding started in 2014, when we were planning for a faculty led study trip to Brazil in summer 2015. Dr. Abeer Ibrahim and her team went extra miles to make sure our trip was designed to achieve the goals of our faculty leader and meet the needs of both faculty leader and student participants. The trip had the perfect mix of company visits and cultural/leisure activities, with outstanding in-country services (friendly and knowledgeable local tour guides, nice hotel accommodations and amenities), but still within a very reasonable price range. Our students enjoyed the trip to Brazil so much and quite a few wanted to do another trip with us when the opportunity comes.

We were so happy with the experience with ARAMFO, so we chose them again as our trip organizer when we are planning for our 2016 summer trip to South Africa! We hope they will stay as our long-term partner as we continue to globalize our programs and our university, and provide more faculty led study abroad trips to enrich the learning of our students.
